# About **RMD** **BOARDS**

**RMD Boards** is a renowned manufacturer of ecofriendly decorative boards. These boards are made from 100% recycled materials and high-quality boards used for interior design applications. These boards offer aesthetic appeal, durability, versatility, and sustainability.

RMD Boards' commitment to environmental responsibility ensures that our products meet the highest quality standards. Their decorative boards offer a wide range of design options for cost-effective and sustainable interior décor projects.

# Our **PRODUCT FEATURES**

# How To MOUNT?

## 1. PREPARATION OF WALL SURFACE

- Prepare wall first for paneling. Scrape the wall with proper tool. Please remove paint from the wall, if any.
- Take the exact measurement of the wall with measuring tape, where RMD Board is to be installed.

## 2. APPLICATION OF ADHESIVE

- Cut the RMD Boards to suit the required size of the wall before applying glue
- Before starting the installation process of RMD Boards, make sure that they are clean on the backside and ensure that the substrate is ready for covering.

- Spread the glue with a suitable notched trowel (such as A3 to B3, depending on the substrate condition)
- It is recommended to apply a fine layer of adhesive on the backside of the RMD Boards and recommended adhesive directly onto the substrate.
- Ensure that the backside of the RMD Board is thoroughly wetted with adhesive to ensure perfect full surface bonding and to avoid any hollow spots.
- Always ensure that the adhesive is not yet cured before pressing the RMD Boards onto the substrate.

## 3. MOUNTING WALL PANELS

- Now lift the RMD Boards carefully and put the same on the wall and press the board firmly onto the substrate.

- For mounting 2 Boards side-by-side a gap of 3-4mm can be kept and filled by using suitable spacer profiles, colour sealant or by using decorative profiles. Alternatively two sheets can be flushed.

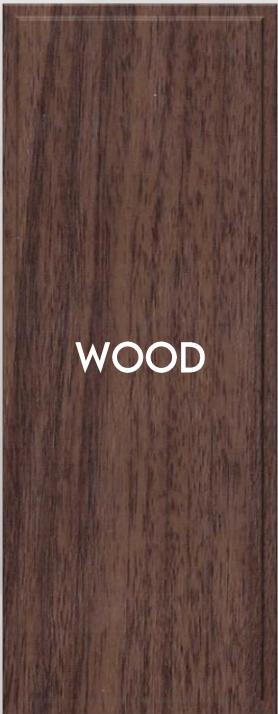

## 4. APPLICATION OF PRESSURE

- Apply even pressure with the help of pressure roller on the RMD Board surface to remove the air trapped and ensure perfect bonding.
- Prepare the borders of the wall panel and wall using masking tape. Apply sealant gently in the space between the tapes, which will serve as a frame for the RMD Board on the wall.

## 5. FINISHING PROCESS

- Remove the masking tape from the RMD Boards once sealant is cured. Hold the freshly fixed Boards into place and allow the adhesive to cure for at least 24 hours before exposing to any mechanical stress.
- Remove surface protection film after all other activities and cleaning of application area is completed. Termite proof, long lasting wall in your favorite design is now ready.
